

We would like to urge you NOT to implement the proposal that would lessen Indiana's Telephone Privacy Law protections. Until we got on the Do Not Call List, our phone rang 3 or 4 times an evening. It got to the place we couldn't eat dinner without interruption. Now, we get almost no calls at all, we went for months and didn't get any. Recently, we started noticing a particular number coming up a lot during the day while we were at work. It was a number we didn't recognize, and had no ID attached. Finally they called when we were there, and we told them we were on our state's No Call list. They haven't called back. PLEASE don't do anything that expose us to all those calls again! This law that Indiana has has made our lives peaceful again.
